

Architecture Knowledge Exchange

AKX

The Architecture Knowledge Exchange (AKX) web portal uses Microsoft .NET technology and a portal framework to deliver a fast and secure location for all System Architecture needs.

- Get latest architecture news and events such as IPR/CMB dates and locations
- Single Sign On integration with AKO - no separate password required
- Download the latest KEIL architecture products
- Product listings are displayed by unit and include architecture owner, version, release date, and file size
- Download tools for viewing architecture products designed with NetViz, Microsoft Visio, Crystal Reports and many
- Provides a link to the Online System Architecture Change
- Provides architecture related documents such as the DoDAF and relevant DOD and DA instructions to support the architecture community
- Download the PEO C3T Master Schedule and briefings
- Read KEIL product overviews to learn more about how our tools can help improve the quality of all architecture products and expedite their development and maintenance

- Tabs are provided for viewing Diagrams, Details, Equipment Listings, and Links
- Future Enhancements Include: Powerful reporting capabilities using Crystal Reports 9
